The Most Critical Key to a Successful Wedding Day

We’ve all been to weddings where everything went smoothly - the entire event was wonderful, from the invitations to the ceremony, the food at the reception, the music - all combined in a wonderful, personal experience for the new bride and groom.

I've been to many weddings like that, and when the happy couple returns from their honeymoon, and they tell me about their day, the first thing they mention is how much **fun** they had – how **stress-free** and **happy** they felt knowing everything was taken care of so they could enjoy their special day.

Successful weddings are no accident. They are the result of months of careful planning and attention to every detail by a professional who knows the industry and the little-known "*insider secrets*" to planning the perfect wedding.

Why waste valuable time *struggling*, when you could be **succeeding** as a \$100,000+ per year Wedding Planner?

The information available to you here – through this exclusive offer – highlights the expertise of Catherine Porterfield, an extremely successful Wedding Planner with nearly a decade of experience planning dream-like weddings in highly competitive and very demanding Washington, D.C. area.

Wedding Planners Are In Demand!

It used to be common for the bride and her family to plan the entire wedding – from invitations to the ceremony and reception.

Not so any longer!

In "*The Wedding Boom*," a report published by the prestigious Conde Nast Bridal Group, the facts show that the percentage of couples hiring a professional Wedding Planner to plan their wedding has DOUBLED in just the last 3 years!

In her report, "Wedding & Honeymoon Statistics," highly respected author and noted wedding expert Susan Breslow Sardone reports that the American wedding industry is BIG business, totaling more than \$50 Billion each year. There are close to 2.5 million weddings every year in the United States – an average of 44,230 weddings every single weekend!

Weddings have gotten much more elaborate as well. No longer a simple afternoon gathering, some weddings are actually a 3-or 4-day event, with theme and destination weddings setting new trends.

With large-scale weddings like this, it's easy to see why the average cost of an American wedding is now over \$27,000!

With that much money at stake – it's no wonder thousands of couples are now hiring **professional** Wedding Planners to make sure their wedding day is flawless.

Work Part Time and Earn \$100,000+ Per Year

I'm serious! Wedding Planners typically charge 15 – 20% of the total cost of the wedding for their services. This means you could plan just 26 weddings, and earn over \$100,000 per year. That's \$27,000 (average wedding cost) x 15% (commission) x 26 (weddings planned per year) = \$105,300 – every year!

Of course, you can plan **more** weddings and **earn even more** – the choice is up to you!

When you start your own Wedding Planning business – you're the boss! You work as much or as little as you want – when you want. There's no time clock to punch – you set your schedule, so you can balance other commitments with children and family.
